

ABDUL QADIR KHAN

Junior Full-Stack & AI Developer

About Me

Self-taught developer with 3 years of hands-on experience building full-stack web apps and AI agent systems. I focus on integrating LLMs (Groq, Gemini, OpenAI) into real products, and I am currently deepening my skills in Agentic AI and backend development through the GIAIC program.

LANGUAGE

- English (Advanced)
- Urdu (Native)

EXPERTISE

- Agentic AI & Multi-Agent Systems
- LLM Integration (Groq, Gemini, OpenAI)
- Full-Stack Web Development
- REST API Design
- Tool Calling & Vector Memory
- Pipeline Automation & Orchestration
- Problem Solving

EXPERIENCE

Independent Full-Stack & AI Developer

Self-employed, Hyderabad, Pakistan | 3 years (2023 – Present)

- Built full-stack web apps and AI agent systems end to end, from backend APIs and databases to the user interface.
- Integrated LLMs (Groq, Gemini, OpenAI) into real products using tool calling, long-term vector memory and multi-agent routing.

PROJECTS

YTFactory — Autonomous AI Video Production Engine

github.com/QadirKhan9/YTFactory-Autonomous-AI-Video-Production-Engine

- Autonomous 23-stage pipeline that turns one topic into a finished 1080p YouTube documentary: research, script, voiceover, stock visuals, FFmpeg render and SEO metadata.
- Multi-provider LLM routing (Groq, Gemini), neural TTS, Whisper word-level captions, and 20 automated QC checks (loudness, subtitle drift) before a human approval gate.
- Offloads FLUX.1-schnell image generation to free Kaggle GPUs through a Hugging Face message bus with sha256 verification and automatic fallback.
- **Stack:** Python, FFmpeg, SQLite, Docker, Groq, Gemini, Whisper, FLUX.1-schnell.

Synthox AI — Multi-Agent Assistant Platform

github.com/QadirKhan9/Multi-Agent-Ai

- A Router Agent (Llama 3.3 70B) delegates each request to 6 specialist agents: chat, web search, image generation, code execution, PDF export and voice.
- Added long-term memory with PostgreSQL pgvector (768-dim embeddings), Redis rate limiting, and a shared fallback across all agents.
- **Stack:** Next.js, TypeScript, Tailwind CSS, Prisma, NextAuth.js, Groq, Gemini, Cloudinary.

Todo App with AI Chatbot

github.com/QadirKhan9/Todo-app-website-with-chatbot

- Stateless FastAPI backend with an OpenAI Agent that manages tasks through tool calling, plus user authentication and conversation persistence.

Jarvis AI — Personal Voice Assistant

github.com/QadirKhan9/Jarvis-AI

- Python assistant with voice commands, speech-to-text and text-to-speech, an AI chatbot, real-time info lookup, image/video generation and a custom desktop GUI.

Physical AI & Humanoid Robotics Book Platform

github.com/QadirKhan9/New-Ai-book

- Docusaurus site with an AI chat widget, one-click Urdu translation, and a full authentication and profile system.

EDUCATION

Governor's Initiative for AI and Computing (GIAIC)

Web Development & Agentic AI Track — in progress (Python, Next.js, AI Agent Development)

Army Public School & College, Hyderabad

Intermediate, Computer Science — 2025 to present

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, HTML5, CSS3, Sass

Frontend: React, Next.js, Tailwind CSS, Bootstrap, Docusaurus

Backend & Data: Node.js, FastAPI, REST APIs, PostgreSQL (pgvector), SQLite, Prisma ORM, Redis, NextAuth.js

AI: OpenAI Agents SDK, Groq, Gemini, OpenAI, Llama 3.3 70B, Whisper, FLUX.1-schnell

Tools: Git, GitHub, Docker, FFmpeg, Cloudinary
